

PEDRO FLYNN

  • Buenos Aires, Argentina

FULLSTACK ENGINEER

- 3+ years of experience in software engineering across full-stack development and data-driven solutions.
- Strong hands-on experience in building scalable applications using .Net / C#, Angular, React, SQL Server, AWS and Azure.
- Professional expertise covers backend API development, microservices architecture, frontend engineering, and cloud-based deployments.
- Proven experience in Oil & Gas, Corporate Financial Systems, Supply Chain, and HR/Sales platforms.
- In-depth understanding of SOLID principles, REST APIs, CI/CD pipelines, and production support in enterprise environments.
- Strong debugging, performance optimization, and problem-solving skills across distributed systems.

Core Achievements:

- Supported and maintained ~30 enterprise financial applications across cloud and on-premise environments.
- Developed internal APIs and systems used in real business operations.
- Improved deployment workflows using Azure DevOps and cloud platforms.
- Transitioned from data analyst role into full-stack engineering with strong business + technical alignment.

PROFESSIONAL EXPERIENCE

Globant 

Nov 2024 — Ongoing

Full Stack Engineer - Full Time     

Client: Contractor for ExxonMobil: a global leader in the Oil & Gas industry. Operating complex financial systems across multiple regions, supporting corporate financial workflows, reporting, and compliance.

Project: Worked on a portfolio of ~30 enterprise financial applications deployed across AWS cloud, OpenShift on-premise, and SaaS environments, focusing on system stability, enhancements, and production support.

Responsibilities:

- Developed and maintained backend services using .Net (C#) for enterprise financial applications.
- Implemented frontend features using Angular, improving usability and responsiveness.
- Managed CI/CD pipelines and deployments using Azure DevOps.
- Provided production support, debugging issues across distributed cloud and on-prem systems.

- Worked with AWS infrastructure and OpenShift clusters for deployment and monitoring.
- Optimized SQL Server queries and resolved performance bottlenecks.
- Collaborated with cross-functional teams to analyze requirements and deliver scalable solutions.

Apr 2023 — Jun 2025

Full Stack Engineer - Freelance .Net Azure Microservices SQL Blazor

Client: Middlesoft delivers enterprise software solutions for clients such as Techint, focusing on internal systems for HR, sales, and operational management.

Project: Developed internal platforms including intranet systems, HR management tools, and Sales APIs using microservices architecture and modern web technologies.

Responsibilities:

- Designed and developed RESTful APIs using .Net (C#) for HR and sales systems.
- Built frontend components using Blazor for dynamic and responsive interfaces.
- Implemented microservices architecture to improve scalability and modularity.
- Designed and optimized SQL Server databases and queries.
- Deployed and managed applications using Azure cloud services.
- Gathered requirements and collaborated directly with stakeholders.
- Applied clean architecture and SOLID principles to ensure maintainable code.

Oct 2020 — Dec 2022

Supply Chain Data Analyst - Full Time .Net SAP SQL Python React

Client: ExxonMobil's supply chain division manages large-scale logistics operations supported by SAP systems, requiring strong data governance and accuracy.

Project: Focused on data governance, reporting, and system integration using SAP (Stripes & GOM), supporting operational decision-making.

Responsibilities:

- Managed and validated supply chain data across SAP systems.
- Developed scripts using Python and SQL for data analysis and reporting.
- Built dashboards and reports for business decision-making.
- Identified data inconsistencies and improved data quality processes.
- Collaborated with technical and business teams to ensure data accuracy.
- Automated repetitive processes to improve efficiency.
- Developed strong domain knowledge in supply chain operations.

EDUCATION

Universidad de Buenos Aires, Facultad de Ingeniería (UBA)

2019 — 2024

Computer Engineer

Combined Bachelor's and Master's Degrees

Colegio Arrayanes

2013 — 2018

Bilingual High School Diploma in Economics and Administration
